- **Water Distributor**  
CRDA Medenine, Regional Commissariat for Agricultural Development
- **Monitoring institutions**  
ANPE : Ministry of Environment  
DHMPE: Ministry of Health
- **Awareness and strategy**  
DGGREE: Ministry of Agriculture  
DGEQV: Ministry of Environment

# Objective 2: Implement a new quality monitoring and early warning system: IT Platform

# Stakeholders can share all information about water quality and will also take a participatory decisions

## Objective 2: Implement a new quality monitoring and early warning system: IT Platform

This IT platform will make an instantaneous comparison between input data and national reuse standard.

In case of non-compliance it will **send alerts to all stakeholders** and a **warning SMS to farmers**.

This system will permit not only a permanent data sharing but also:

The establishment of **new participatory monitoring system** based on an **open and transparent partnership** between all **stockholders at different levels** (water supplier, water distributor, monitoring institutions and farmers).

## This system therefore promotes:

- ✓ Participatory decisions
- ✓ Transparency
- ✓ Efficiency
- ✓ Confidence
- ✓ Accountability
- ✓ Openness
- ✓ consistency
- ✓ Data Sharing
- ✓ Cooperation

**Good Water Governance**
